

# THE STAIRWELL PRIVATE VAULT STORES EVERY FILE IN YOUR ENVIRONMENT

Your Data Kept Private. Your Hindsight Kept Forever.

## THE PROBLEM: SECURITY COMES WITH AN EXPIRATION DATE

Most security tools rely on logs. But logs expire. After 30, 60, or 90 days, your visibility disappears. When a new threat emerges, you cannot look back to see if it was already inside your environment.

At the same time, many file analysis or malware platforms require you to upload files into shared crowdsourced systems where your data becomes part of someone else's dataset. You lose both history and control of your data.

## THE SOLUTION: STAIRWELL PRIVATE VAULT

The foundation for continuous malware intelligence.

### BUILT FOR PERMANENT VISIBILITY

A continuously growing, private library of every executable file and artifact your organization has ever encountered.

### KEEPS EVERYTHING FOREVER

Every eligible file is preserved within seconds and stored in your private immutable data lake, beyond the reach of attackers.

### ALWAYS REANALYZING

Every file is continuously reevaluated as new threat intelligence emerges.

### 100% PRIVATE

Your data is never shared, pooled, or exposed. It never leaves your control.

## WHY STAIRWELL'S PRIVATE VAULT MATTERS

Security without history is guesswork. Stairwell's Private Vault gives you hindsight in real time. You can ask if a threat has ever existed in your environment and trust the answer. When every file is stored there are no gaps or expiration. Instead you get full visibility across all time. You do not share your data with the world to gain intelligence. You own it and keep it private.

## STAIRWELL DELIVERS

### REDUCE LOG STORAGE COSTS

Storing files is the source of truth and removes unnecessary log storage requirements.

### END DATA EXPIRATION

Eliminate 30, 60, or 90 day visibility limits. Your history is permanent.

### MAINTAIN FULL CONTROL

Keep sensitive files private. No sharing. No exposure. No tradeoffs.

### CONTINUOUSLY IMPROVE DETECTION

Historical data is reanalyzed as intelligence evolves. Your visibility gets smarter over time.

### SCALE WITHOUT COMPROMISE

Multi petabyte infrastructure designed for continuous analysis, without sacrificing privacy.

CONTINUOUS ANALYSIS OF EVERYTHING. IN YOUR OWN PRIVATE VAULT.
